SaaS Self-Order / WhatsApp Assisted Order

Start the Team Program

GEGIX focuses on custom-fit uniforms for healthcare teams.

We connect product selection, member profiles, embroidery, group ordering, and bulk customization into one practical B2B uniform program.

- **Built for teams**

Uniform programs for clinics, medical groups, hospital departments, dental practices, veterinary teams, aesthetic clinics, and institutional projects.

- **Fit stays personal**

Each member can submit a body profile instead of relying only on standard size charts.

- **Supports B2B orders at multiple scales**

Built for small teams, clinic chains, institutional purchasing, and 200+ set bulk customization.

Our advantage is putting customization inside the team order flow.

B2B buyers need a clean path to align products, collect member details, confirm embroidery, and move to quote approval.

- **Body profiles**

Individual fit details for every member.

- **Team colors**

One visual system by location, team, or role.

- **Embroidery**

Logo, name, title, and department details.

- **Central quote**

One organizer confirms products and quantity.

- **Member collection**

Less back-and-forth on size and customization.

- **Order handoff**

Confirmed quotes move toward formal ordering.

B2B FAQs before quoting.

Customers can self-order or use assisted service. Fabric, colors, embroidery, sizing, logistics, and quote details are confirmed before order approval.

Do you support small and large team orders?

Yes. We support small teams, clinic chains, and institutional buyers. Orders above 200 sets can discuss dedicated colors or fabrics.

Are fabrics and colors continuously available?

Core fabric families remain continuously available. Final colors are confirmed by sample, color approval, and quotation.

How are member sizes collected?

Body profiles can collect member name, size, height, weight, fit preference, and notes.

Can customers place orders by themselves?

Yes. Customers can use the SaaS portal for self-ordering or work with GEGIX through WhatsApp / assisted trade ordering.

Can we add logo, name, and role embroidery?

Yes. Team embroidery profiles can standardize logo, name, role, department, and placement rules.

How do shipping and freight work?

Standard B2B orders can include free shipping. Smaller orders usually ship by express; larger orders usually ship by sea, with paid express available when faster delivery is needed.

Scrub Product Line

Scrubs are the core of the team uniform program.

Choose tops, pants, and set directions first, then customize around team colors, role needs, and individual fit.

- Tops
- Pants
- Sets
- Team colors

Compare fabric weight, stretch, and use cases.

Scrub fabrics can be selected by team role; quotation can confirm weight, composition, function, color, and usage together.

ShieldWeave

220 g/m² | Knit

Composition: 99% polyester + 1% conductive fiber

Function: Anti-static core fabric

Key: Anti-static, structured, durable

Use: Work pants, warehouse / lab uniforms

AirFlex

180 g/m² | Woven

Composition: 94% polyester + 6% spandex

Function: 4-way stretch, quick dry, silver ion antibacterial

Key: Elastic, quick dry, soft

Use: Active nurses, frequent bending

AirFlex Heavy

205 g/m² | Woven

Composition: 92% polyester + 8% spandex

Function: 4-way stretch, quick dry

Key: Stretch, heavier hand feel, quick dry

Use: Winter style, outdoor medical teams

CottonFlex

190 g/m² | Woven

Composition: 75% polyester + 7% spandex + 18% rayon

Function: Rayon 4-way stretch

Key: Cotton-like hand feel, elastic, absorbent

Use: Sensitive skin care, clinic daily wear

Core fabric families remain continuously available; final selection is confirmed by sample, color approval, and quotation.

Scrub colors by fabric family.

Color chips help buyers compare team image directions. Final colors are confirmed by sample and quotation; HEX values are planning references.

AirFlex Heavy

28 colors

CottonFlex

16 colors

Core fabric families remain continuously available; orders above 200 sets can discuss dedicated team colors.

Orders of 200+ sets can develop dedicated fabric and team colors.

Core fabric families remain continuously available. When a team needs a specific color, hand feel, weight, or brand expression, the order can move into a custom development track.

01

Define Need

Color target, fabric hand feel, weight, role context, and budget range.

02

Sample Approval

Develop samples against the target color and fabric direction before order confirmation.

03

Bulk Production

Built for clinic chains, group purchasing, schools, and repeat team programs.

Custom colors are confirmed by sample approval and are best for brand colors, role colors, or location-wide uniform systems.

Define embroidery rules first so repeat orders stay consistent.

Each team can standardize logo, name, role, department, and placement rules; GEGIX can organize the order from the profile.

Team customization connects colors, embroidery, member profiles, and delivery rules in one order system.

- | | | |
|----|----------------------------|--|
| 01 | Unified Image | Team colors, role colors, location colors, and logo standards. |
| 02 | Member Management | Collect embroidery, size, body profile, and notes by member. |
| 03 | Delivery Management | Supports bulk production, replenishment, repeat orders, and order records. |

Best for

Clinic chains
Medical
groups
Schools
Veterinary
teams
Aesthetic &
dental

Scrub sets make team ordering faster.

The organizer chooses a set direction, while each member still submits size, body profile, and embroidery details.

WOMEN'S SET

Women's Cura Basic Rune Classic Scrub Set

A women's set option for a consistent team standard.

Team use: department standard

MEN'S SET

Men's Cura Basic Rune Pro Scrub Set

A men's set option for mixed teams and repeat orders.

Team use: mixed teams

Lab coat fabrics support anti-static, skin comfort, lightweight, and seasonal needs.

Different roles can choose fabric series based on professional image, skin feel, breathability, antibacterial needs, and warmth.

Aegis Coat
220 g/m² | Anti-static core

Key: Anti-static, structured, durable

Use: Work coats, warehouse / lab

Mova
180 g/m² | Anti-static mid-weight

Key: Anti-static + balanced weight

Use: ER / ward daily use

Cotura

Lab coats fit doctors, front desk, and customer-facing clinical roles.

They can work with the scrub system or stand alone as a professional clinical outer layer.

- 01 Professional Layer** For doctors, providers, front desk, and clinical customer-facing roles.
- 02 Embroidery Ready** Standardize name, role, department, or logo embroidery.
- 03 Works With Scrubs** Build a unified team uniform system with scrub uniforms.

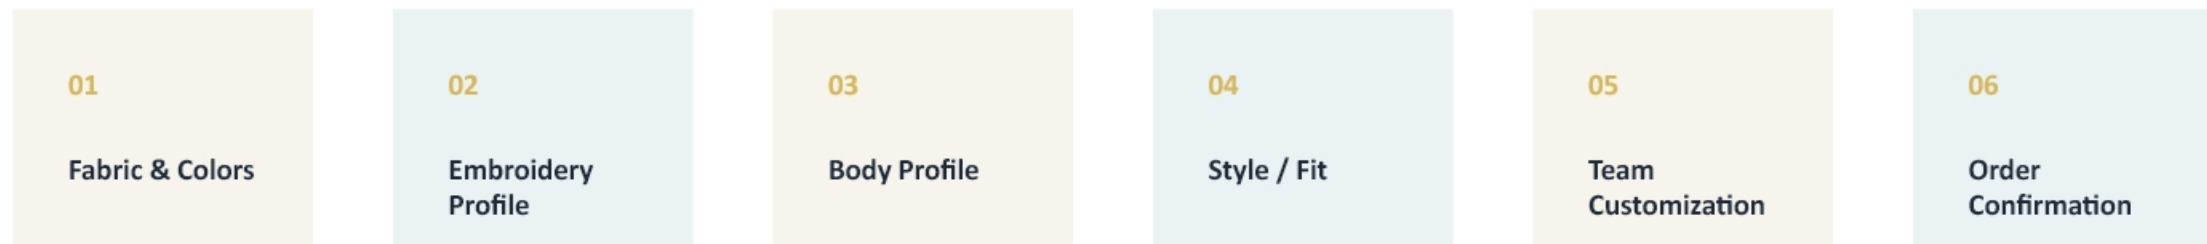

Caelric Structured

Men | Regular sleeve

Lab coats can enter the same team order workflow with scrubs, embroidery profiles, and body profiles.

Lab coats follow the same order logic to reduce team coordination work.

Customers can enter details in the portal, or GEGIX can organize the order from WhatsApp communication.

B2B customers can self-order in the portal or use assisted trade-style ordering.

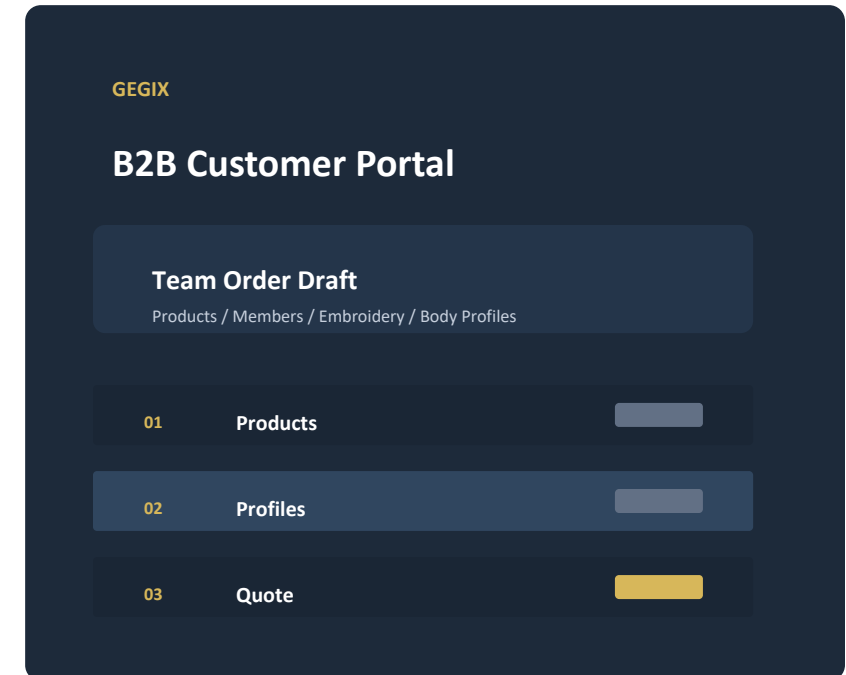

This supports different buying habits: mature teams can manage profiles and orders directly, while service-led buyers can work through WhatsApp and let GEGIX organize details and quotes.

SaaS Customer Portal

- Choose products, colors, and quantities
- Complete embroidery and body profiles
- Submit the team order in one place
- Best for standardized repeat buyers

WhatsApp / Assisted Trade Order

- Customer sends needs and member details
- GEGIX organizes the order
- Confirm quote, timeline, and details
- Best for service-led buyers

Both paths can run in parallel: customers self-serve when ready, and GEGIX steps in when assisted service is needed.

Start the team uniform program.

Submit your team needs and we will confirm products, colors, sizing, customization, and delivery details.
